

About EQUITONE

We work with and for architects to design durable and aesthetics facades that reduce environmental impact.

Our mission is clear: to support architects in creating durable and aesthetically façade solutions that leave a positive impact on the world.

With 120 years of experience, EQUITONE simplifies the complexities of façade selection and provides expert support, enabling you to focus on what matters most - bringing your architectural visions to life.

EQUITONE [LUNARA]

Description

EQUITONE [lunara] is a through coloured panel. The surface of the panel is characterised by a randomised textured finish that is unique to EQUITONE [lunara]. The two colour shades accentuate the authenticity of the material. The panel receives a hydrophobation that makes the panel water repellent.

Technical Specifications

Thickness	Panel Sizes	Weight
10 mm	2500 x 1220 mm	18.6 kg/m ²
	3050 x 1220 mm	

Benefits

- fire safe (no fire ignition, no spread of fire)
- sound insulating
- resistant to extreme temperatures and frost
- water resistant (if in compliance with application guideline)
- resistant to many living organisms (fungi, bacteria, insects, vermin, etc.)
- resistant to many chemicals
- environmentally friendly, no harmful gas emissions
- strong, rigid panels

Application

- **Touch:** Rough, unpolished fibre cement surface with delicate linen touch.
- **Visual:** Expressive, natural, unique.
- Original through-coloured material with highly expressive fibre cement structure.
- The production process makes each panel unique in colour, texture and surface.
- Natural colour differences, possibly accentuated by the orientation of the sheet, the viewing angle and the effects of light and moisture.

A question? We're to support you, let's talk about your project!
